EDUCATION

Bachelor of Computer Science and Engineering, CSJMU Kanpur

2023- 2027

SKILLS

Programming Languages: JavaScript, Typescript, Java, C

Database and Language: Experience in Mongo DB, MySQL, SQL (Intermediate)

Frameworks: Working experience in React JS, Express JS, Node JS

Version Control Tools and IDE: Git, Github, Visual Studio Code

Course Work: Database and management system, Object-Oriented Programming, Software Development, Computer Networks, Operation Systems, Data Structures, and Algorithms

Work EXPERIENCE

Web Developer at Krrid

(Feb 2025 – July 2025)

- Built responsive websites using Tailwind CSS and JavaScript. –
- Designed clean UI layouts optimized for both desktop and mobile. –
- Practiced pixel-perfect implementation and modular CSS. –
- Frontend fully designed and implemented to ensure smooth user experience.

PROJECTS

Yantra Cartographer astronomicalyantra.netlify.app

Tech Stack: React, Three.js, JavaScript, Trigonometric Algorithms

- Built an interactive web app that generates **accurate 3D models and dimensions** of traditional Indian astronomical instruments (Yantras).
- Implemented **latitude-based trigonometric formulas** to compute parameters like height, radius, and inclination for each yantra.
- Integrated **Three.js** for real-time 3D visualization with smooth rotation, lighting, and responsive controls.
- Added **data export features** for downloading computed dimensions (JSON/CSV) and 3D models (GLTF).
- Focused on blending **India's astronomical heritage** with **modern web technologies** for education and research.

AI-Enabled Marine Data Integration Platform

Smart India Hackathon 2025 Project (Group Project)

- Developed an AI-driven unified platform to integrate and analyze marine datasets (oceanographic, fisheries, and DNA data).
- Implemented automated data pipelines for real-time ingestion and standardization across global sources.
- Used AI/ML models for species identification, DNA matching, and ecosystem prediction.
- Built interactive dashboards and geospatial visualizations for data insights and decision-making.
- Tech Stack: Python, React, FastAPI, MongoDB, TensorFlow, Cloud Storage, REST APIs

Portfolio Website <https://sudhanshusingh0624.netlify.app/>

Tech Stack: React.js, Tailwind CSS, Framer Motion, GSAP

- Built a responsive and animated personal portfolio to showcase projects and skills.
- Implemented smooth scrolling and interactive animations for better UX.
- Deployed using Netlify.

Certifications

Certificate of Participation –

- TATA Crucible Campus Quiz 2024 (Unstop)
